

# Rake For The Planet

Oct. 29 & Nov. 5

Want to do something good for the planet this fall? Join the MyGreenCranford Green Team members and keep your power blowers in the storage shed and "rake for the planet" one day or more during this fall leaf clean up season.

## Facts about Power Equipment

- ✓ The average blower measures 70-75 dB at 50 feet and can reach 90-100 dB at the operator's ear.
- ✓ Blowers' high-velocity air stream removes topsoil, mulch, and other organic material from your lawn and garden.
- ✓ Emissions from the two-stroke combustion engine include liquid and solid particulate matter as well as gaseous carbon monoxide, nitrogen oxides, and hydrocarbons.

## Benefits of Human Power

- ✓ No negative impact on our environment.
- ✓ The exercise will burn calories and improve your health.
- ✓ Make the day a family event. The time spent together will have a positive effect on the kids and will teach them the value of working around the house.
- ✓ Your neighbors will appreciate the quiet.
- ✓ Raking is better for your lawn and garden.

Make your pledge to rake for the planet at [www.mygreencranford.org](http://www.mygreencranford.org)

Resolution 2011-334.  
This program has been endorsed by  
the Cranford Township Committee.
